Company Makes a Proposition to the City Council.

It developed yesterday that a proposition had been presented to the city council by the water works company, offering to make a reduction in the tates which prevail, but that the same had been suppressed by that body, for reasons best known to themselves. It was learned also that the city has begun suit against the company and parties connected with the water works are concerned over the situation, fearing that the public will understand that the council's action has forced the corporation to make a reduction in the rates, when as a matter of fact this after was made by it before any action on the part of the city legislature, looking toward the planting of a suit. The communication which was sent by the water company to the council was dated July 8 and was signed by W. H. Rowe, the president of the same, it was addressed to the mayor and city council and says:

Gentlemen: As a complete settlement of the differences which exist between Ogden City and the Bear River and irrigation and ogden Water Works company and in compliance with your request and for the purpose of readjusting the rates for water charges now prevailing this company proposes to make a reduction in water charges as shown by the schedule hereunto attached. This schedule, it will be observed, contains three columns, the first indicating what the water rates were when the old system was owned by the city, the second column shows
